★ **IMPORTANT:** This project does not work with tissue paper that is shiny on one side, the kind sold in the wrapping paper aisle at Christmastime. Buy tissue paper from a craft or art supply store.

Step 2) For your first one, start with a square...fold in half and in half and in half (keep going), just a simple fold so you can see how this works. If you get too crazy with wild folding patterns it can be tricky to unfold.

Step 3) Dip quickly. If you hold it in the color too long it will soak up all the liquid and be a soggy mess. And there won't be any paint left for anyone else! Count "one banana" and that's about the right length of time.

Step 5) Small children will need help unfolding. The paper is wet and tears easily. As you get to the last unfold, an extra pair of hands pulling gently on either side can be helpful (yes even for grown-ups!).

SOME THINGS YOU CAN DO WITH YOUR PRETTY PAPER!

- * tree skirt around a small Christmas tree or potted plant
- * placemat under a table centerpiece
- * festive wall hanging
- * "stained glass window"
- * and of course wrapping presents!

WRAPPING TIP: The lettering on your gift may show through this thin paper. You can first wrap your present in white paper, butcher paper, kraft paper, or newspaper, and then your Pretty Paper.
